Your challenge – should you choose to accept...

Apply your data science skills!

Discover insights in a real-world retail time series data set.

Tell a story!

Discover technologies and concepts to generate customizable short animated data stories.

Automate it!

Show how these steps can be combined to transform insights into animated data stories automatically.

Discover **insights** in a real-world business data set

Dataset

- We suggest to use an open dataset collected from a Turkish retail company.
www.kaggle.com/berkayalan/retail-sales-data
- You'll find daily observations for products sales, revenue, stock etc. for a period of 3 years.
- You can explore different hierarchical levels of the dataset (e .g. which store, which product, which product category...).
- You are free to use any other open dataset, we already verified that this one will deliver some insights.

Discover **insights** in a real-world business data set

Insights

- Use your analytical mind!
- Think about what insights might be relevant?
- What can you get out of the dataset?

Discover technologies and concepts to generate customizable short **animated data stories**.

- Use your creative mind!
- Tell us a story behind the data, by transforming business insights into an animated data story.
- Explore existing animation frameworks and technologies.
- Think about how to automate/streamline the process of story generation.

Possible approach:

- Use web technologies like HTML5, JavaScript, SVG, GSAP, D3 to generate animated stories.

What you'll get from us to provide you an easy start

- A Jupyter Notebook, which gives you first insights into the dataset along with some examples for possible insights and approaches.
- A hand-picked collection of suitable frameworks and libraries for each subtask (No obligations, just starting points).
- Responsive support during the HackaTUM via Discord and if needed with in-person feedback meet-ups.

GitHub

git.io/J1Efk

Assessment Criteria

- Quality and relevance of your insights
- Efficient use of TS analysis methods

- Overall architecture
- Abilities to automate and transfer the pipeline

- Quality and originality of your data stories
- Overall presentation quality

Opening Hours

Virtual Booth

Friday

- 15:00– 17:00
- 19:30–20:30

Saturday

- 14:00–16:00

Company Room

Friday

- 18:30–20:00

Saturday

- 10:30–11:30
- 15:00–16:00

Discord

Saturday

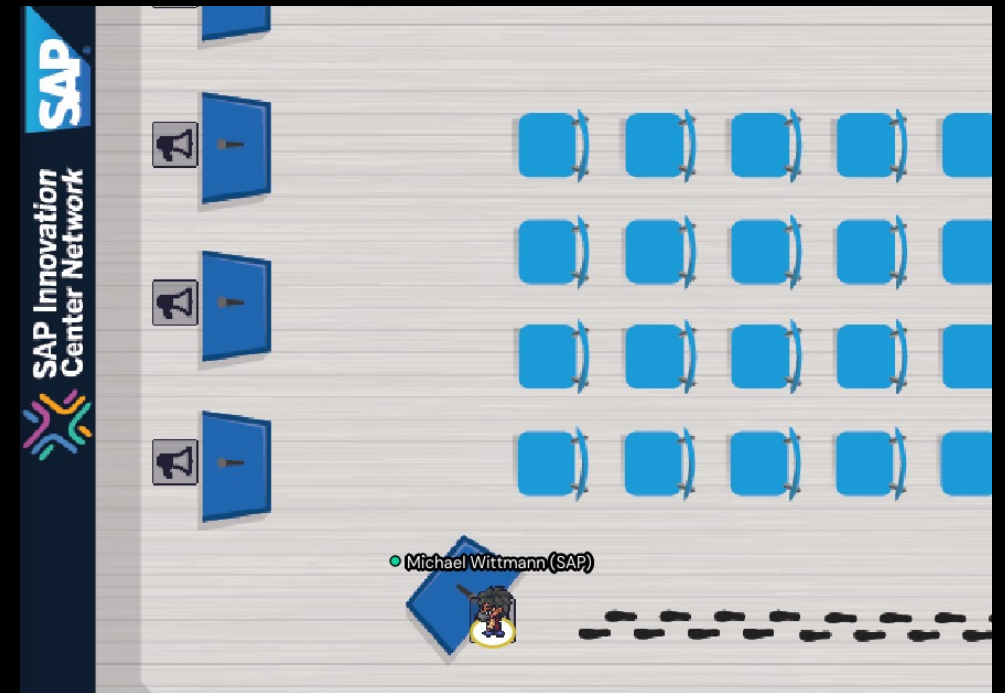

09:00–18:00

Sunday

09:00–12:00

You will find us at the booth and in Discord during the mentioned time slots.
Regardless of the core hours, we will still drop by every now and then 😊
